custom-made for your home

|| COUNTY WINDOWS ||

WINCHESTER LTD

Founded in 1952, County Windows has enjoyed a reputation as the leading installer of quality conservatories, windows and doors throughout Hampshire, Wiltshire, Dorset, Sussex and Surrey. We are a genuine British Kitemark company (Certificate No. FM 23286) and we employ our own installation teams ensuring that time and care is taken over each and every installation.

Customers can visit our Conservatory Village and take their time to view the superb range on show. With an unrivalled reputation to protect, County Windows employ salaried sales staff trained to advise not hard sell. You can see the difference for yourself when you visit the Conservatory Village.

County Windows have been helping satisfied customers improve their homes for years and we are your local experts for the professional design and installation of conservatories, windows and doors. We have used our experience to search for the very best suppliers in the market for all the products we offer. Forging strong relationships with them, County Windows only work with those whose products can fully complement our very high standards and satisfy your requirements.

A Perfect Setting

Don't forget, that your intended use may influence your choice of conservatory style - for instance, if you are planning a conservatory with two distinctly separate dining and relaxation areas then a P-shape may be the style for you. Again - we will talk through all of the options and create a bespoke conservatory just for you.

Modern conservatories, with insulated bases and cavity walls which feature double-glazed units and a thermally efficient roof, can indeed be used all year round. By making use of the recent advancements in roof glazing materials we can ensure your new room is warm in the winter, by trapping as much heat as possible and encouraging solar heat gain from whatever sun is available, yet doesn't over-heat in the summer, by using glass that reflects unwanted heat. We can even fit glass that uses the power of the sun and rain to clean itself!
